TECHNICAL SKILLS

Languages: Python, Java, Kotlin
Core Computer Science: DSA, OOP, DBMS & SQL (Basic), OS(Basics) , Computer Networks
Software Development: REST APIs, Debugging, Testing Basics, SDLC & Agile (Basic)
Databases: SQL (basic),Firebase Firestore
Tools & Frameworks: FastAPI, Flask, Git, Gradio, VS Code, IntelliJ, Jupyter
AI / ML (Supporting): NLP, Transformers, HuggingFace, Scikit-learn, BERTScore

PROFESSIONAL EXPERIENCE

- App Development Intern – SkillVertex**
Jan 2024 – Mar 2024
- Built and deployed mobile and web applications focused on real-world use cases.
 - Integrated Firebase Authentication and Database services.
 - Applied UI/UX principles and responsive design practices.

PROFILE

Aspiring Software Engineer with experience in backend development, application design, and data-driven systems. Strong in Java, Python, OOP, and Data Structures, with hands-on experience building modular, scalable applications. Passionate about building reliable software solutions and learning enterprise-grade engineering practices.

PROJECT EXPERIENCE

High-Concurrency Enterprise Banking Engine

- Architected a thread-safe backend processing 1,000+ concurrent transactions with zero race conditions using ReentrantLock.
- Implemented deadlock prevention via resource ordering and fairness policies to eliminate thread starvation.
- Built asynchronous audit logging and automated stress tests to ensure system reliability and data integrity.

Legal Contract Analyzer (AI/ NLP)

- Developed an interactive chatbot using LangChain and LLMs with contextual conversation handling.
- Designed backend logic for prompt chaining and response management.
- Tech: Python, LangChain, LLM APIs

LLM-Powered Conversational AI (Mistral)

- Built an AI-powered system to summarize legal contracts, extract key clauses, and generate questions automatically.
- Implemented answer evaluation using BERTScore and auto-correction via text-generation models.
- Designed a Gradio-based web interface for legal students and professionals.
- Tech: Python, Transformers, Scikit-learn, PyMuPDF, Gradio

PlanifyAI – AI Study Plan Generator

- Created an AI-based system to generate personalized study plans from user inputs.
- Focused on automation, scheduling logic, and clean user interaction.

EDUCATION

B.Tech in Computer Science Engineering
SRM Institute of Science and Technology,
Chennai **Sept 2022 – Present**
